

BIOCOMPIG BV

Supplier of pelletized organic fertilizer

WinSect 3-3-2,5

Organic fertilizer derived from insect feces, so called frass:

Product is suitable for well-balanced agricultural practices and contains high concentration of chitin. The product stimulates a good root formation, improves the soil structure and increases the biodiversity in the soil. Chitin is the major component which activates antagonistic activity therefore can suppress and interfere the normal growth and activity of plant pathogens. The chitin is a perfect feeding source for micro-organisms like *B. subtilis*, Protozoa, Mycorrhiza and Actinomycetes.

WinSect 3-3-2,5 acts as a soil activator that brings back the ecological balance into soil.
